WP2 OVERVIEW

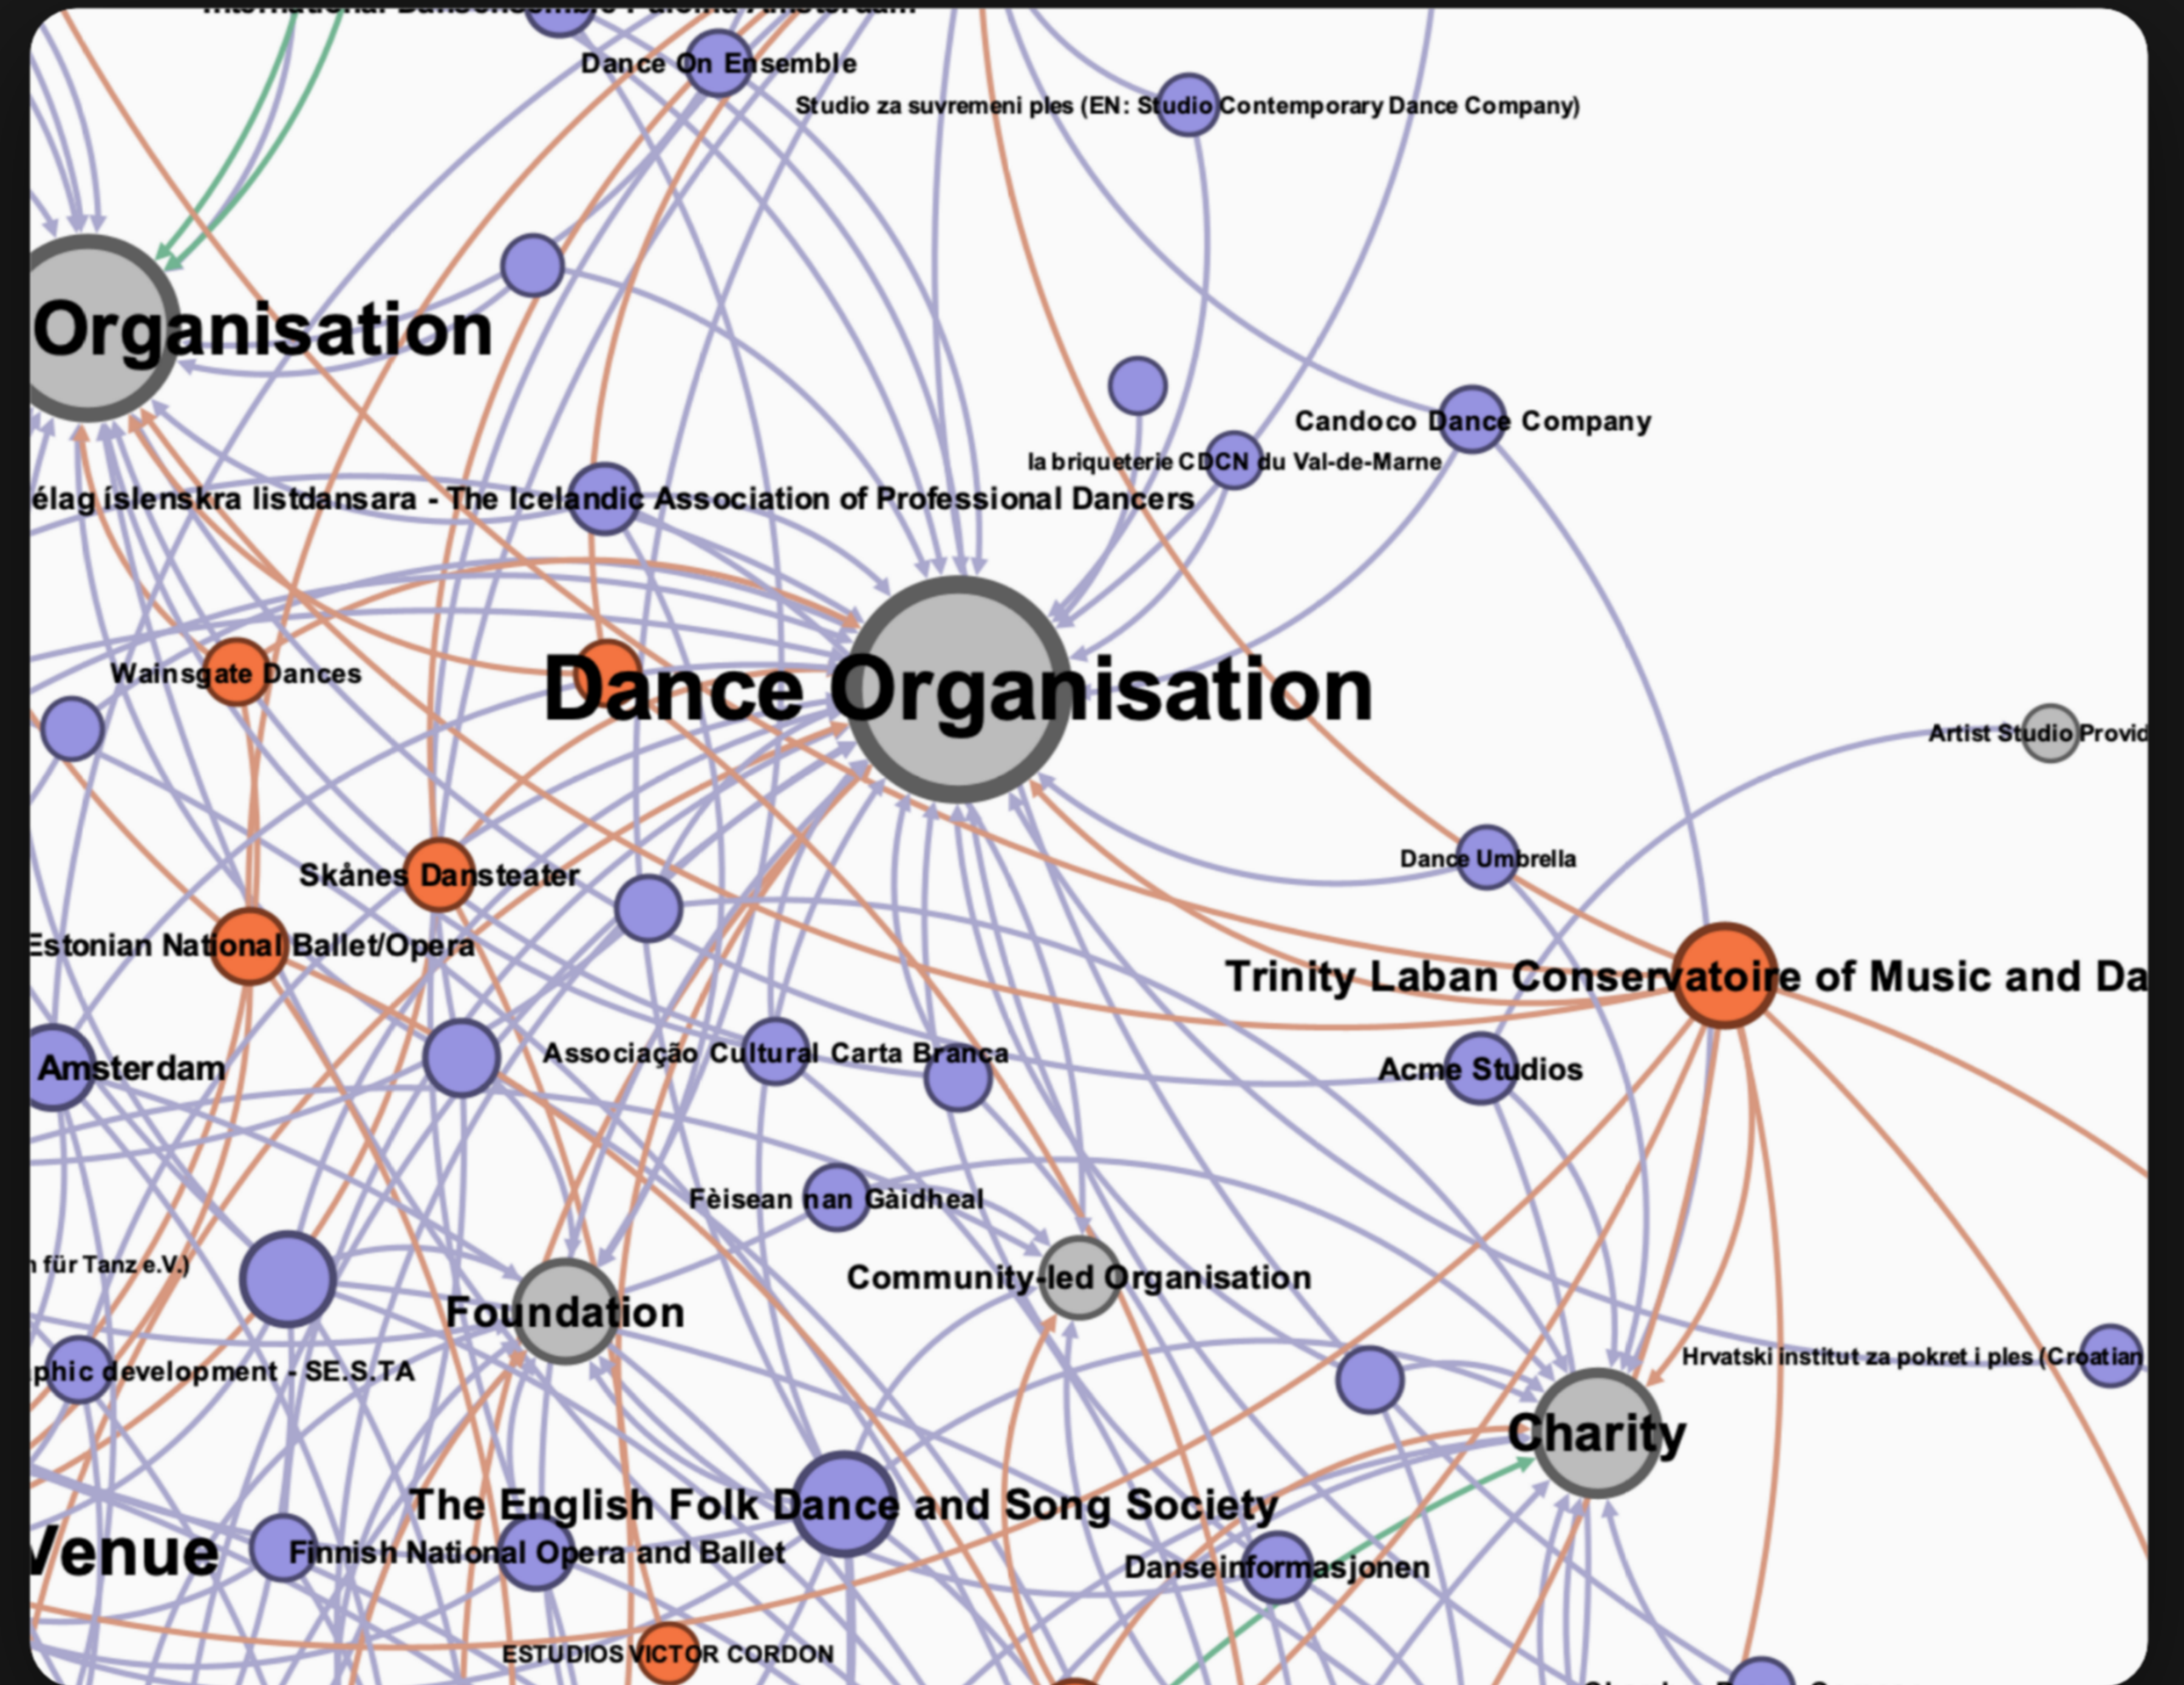

- Survey → European dance heritage knowledge graph (shared with WP4)
- D2.1 (M3) and D2.2 (M18) delivered
- Analysis & application continues

KEY FINDINGS FROM THE SURVEY

- Sector's framing of "dance heritage" ≠ UNESCO's 2003 ICH categories
- Key themes: embodied knowledge, creative reactivation of archives, heritage as evolving
- Funding is the dominant need
- Majority engage marginalised communities/practices

SURVEY TO GRAPH

- Survey data → Wikibase graph
- Structured data ingested; open text is harder

CHALLENGES: THIRD-PARTY & MARGINALISED DATA

- Hardest ethical terrain in the dataset
- 6 of 88 individuals declined to be named
- Third-party names redacted unless narrowly justified

THIRD-PARTY NAMES: THE THREE-PART TEST

1**PROFESSIONAL ROLE**

Named for their work, not their private life

2**ALREADY PUBLIC**

The stated information is already public

3**JUST A FACT**

A factual mention, not a judgement

All three must hold, or the name is redacted.

Sensitive personal details – sexuality, religion, politics – are always removed, no exceptions.

LESSONS: THE WEIGHT OF DECISIONS

- Judgment calls at every stage (not only survey design)
- Responsibility to the future

COMPLEXITY: ACCESS TO RICH OPEN-TEXT DATA

- Richest material, hardest to share responsibly
- Controlled tier: redacted dataset (incl. open text) + framework + matrix

WHAT'S NEXT?

- Sign-off of the data-sharing & access guidelines
- DMP amendment → v2 (holdings, licensing, barriers)
- Disclosure-risk assessment – precondition for marginalised text
- Deposit via a trusted repository

DISCUSSION

- a) Access to the open-text data – protecting people vs. keeping it usable
- b) Testing the approval workflow
